7 INTERNATIONAL
15 NATIONAL CONGRESS OF TURKISH SURGICAL AND OPERATING ROOM NURSES

4-7 NOVEMBER 2027
Spice Hotel , ANTALYA

Dear Colleagues,

On behalf of the Turkish Surgical and Operating Room Nurses Association, we are delighted to invite you to our **7th International & 15th National Congress**, which will be held on **4–7 November 2027** at **Spice Hotel, located in Belek, Antalya**, Türkiye.

Under the theme **“Empowered Minds, Unchanging Touch in the Digital Age”** our congress will explore the opportunities offered by science and technology alongside the human connection at the heart of nursing. As artificial intelligence and digital technologies transform surgical care, we will reflect together on the importance of our professional knowledge, clinical decision-making skills, ethical responsibilities, and compassionate care. Our aim is to integrate the opportunities offered by digital transformation into our professional practice in ways that strengthen patient safety and person-centred care.

Our association’s longstanding congress tradition continues to grow through your valued contributions. At every congress, we share knowledge and experience, build new friendships, and strengthen our professional solidarity. By bringing together academics, practising nurses, and nursing students, we believe this gathering will offer diverse experiences and perspectives that contribute to the advancement of surgical care.

Our scientific programme will address current topics ranging from artificial intelligence, digital health, and clinical decision support systems to simulation, digital competencies, and lifelong learning. Sustainable operating rooms and climate change, safety culture and risk prevention, innovation in surgery, current approaches to wound care, and surgical site infections will be among the programme’s main topics.

Alongside sessions on enhanced recovery protocols and updates to international perioperative nursing guidelines and recommendations, including those of AORN and EORNA, we will offer courses to strengthen our colleagues’ professional knowledge and skills. Lectures, panel discussions, debates, and abstract presentations will bring academic knowledge and clinical experience together.

The congress will be held in Turkish. AI-powered real-time translation will be available, allowing participants to follow the sessions in their preferred language, subject to the languages supported by the system.

Through our social programme, set against Antalya’s natural beauty, we also hope to enjoy time together and ensure that you leave the congress with lasting memories.

We look forward to welcoming you to a congress enriched by your research, experiences, and perspectives. We warmly invite all our colleagues to join us in shaping the future of surgical care together.

With warm regards,

On behalf of the Congress Organising Committee

Congress President

Prof. Dr. Filiz ÖĞCE
